Open-face cycling / MTB helmet	17 total;5 under the removable cover	51–56 /54–60 cm	280 /320 g with cover

01 / PRODUCT OVERVIEW

WHAT IT IS BUILT FOR.

Stelvio combines a polycarbonate shell and EPS in an in-mould construction. Its removable magnetic cover closes five central vents, while the peak can face forward or sit at the Salice presents six combinations of these parts. A micrometric rear rotor adjusts fit a carries a red light. The supplied 2026/27 catalogue agrees with the current product s on 51–56 cm and 54–60 cm size ranges, with claimed cover-inclusive masses of 280 a g respectively. The manufacturer states EN 1078 and CPSC certification; the actual su EU declaration identifies EN 1078:2012+A 1:2012 for the 2026 lot. Price, local stock and complete sales-market list are unannounced in the inspected material.

BEFORE YOU BUY

DETAILS WORTH CHECKING.

- Manufacturer specifications and documentary checks are not independent fit, crash-protection, airflow or aerodynamic testing.
- This is an open-face model. The supplied material does not establish a downhill-specific or full-face approval; follow the requirements of the intended discipline and venue.
- Stelvio sizes are 51–56 and 54–60 cm. Adjacent Ghibli 52–58/58–62 and Mini 46–54 catalogue dimensions belong to different helmets.
- Masses are manufacturer claims including the cover. Price, stock, exact light runtime/battery and complete market coverage remain unknown.

SOURCES

WHAT THIS PROFILE IS BASED ON.

Manufacturer-authorised informational profile, compared with the current official product, supplied Italian/English product sheets,2026/27 catalogue and 2026-lot EU declaration. Specifications are manufacturer claims; no ride or laboratory test was performed.

- Current official Stelvio variant
- Official Stelvio product detail
- Manufacturer-supplied 2026/27 catalogue and Italian/English sheets
- Manufacturer-supplied 2026-lot EU declaration

COVER

The removable cover masks five of seventeen vents. Salice describes weather-dependent configuration choices; no independent thermal, aerodynamic or impact-performance comparison is provided.

CONFIGURATIONS

The manufacturer shows six arrangements with cover and peak. The peak can face forward or sit at the rear; its advertised aerodynamic effect is a manufacturer claim, not a measured MTBSpot result.

03

RETENTION AND REAR LIGHT

Micrometric rear fit rotor and an anti-removal retention system are described. A red rear light is built into the adjustment assembly; runtime, ingress rating and battery specification are not published in the inspected sheets.

04 / COMPONENTS

CURRENT OFFICIAL BUILD.

CONSTRUCTION, VENTILATION AND FIT	
SHELL / LINER	Polycarbonate and EPS, in-mould construction
VENTILATION	17 vents; removable magnetic cover masks 5 central openings
PEAK	Forward visor or rear-mounted position
